WORK/PROJECT EXPERIENCE

Zuitt Coding Bootcamp

Metro Manila, PH

FerryFast

February 2020

- FerryFast is an online fastcraft booking system which allows the user to easily book a schedule for a fastcraft going to their desired destination.
- The site features date and time scheduling all within a single page and also a page for the admin to handle and manage data from/for the client page.
- Technologies: Git, MongoDB, Express.js, React.js, Node.js, GraphQL, Apollo Server, Material UI, Heroku

Town Portal

December 2019

- Town Portal is an asset management system that manages the data of the users and equipment used in an internet cafe.
- The system allows the user (owner) to create, retrieve, update and delete the data of the equipment and also manages the deactivation and restoration of the account of the other users (manager & staff). The user can also upload their own profile picture for their account and allows them to change their password or reset through email.

- Technologies: Git, HTML, CSS, Bootstrap, Sass, JavaScript, jQuery, Fetch API, PHP, Laravel, MySQL, Heroku

LCShop

November 2019

- LCShop is an online store that sells eSports merchandise associated with a popular video game named "League of Legends".
- It is a static web page but is responsive in either small or large devices.
- Technologies: Git, HTML, CSS, Bootstrap, JavaScript, jQuery

Xurpas, Inc.

Metro Manila, PH

Globe LMX

February 2021 - December 2021

- LMX is a lead management system where "leads" are the potential customers of Globe Telecom, Inc. They are recorded into the system for nurturing and fully turn them into consumers by availing Globe's services or products with the assistance of Globe agents.
- The system has a mailing feature which sends the leads an email about the available internet plans depending on the availability within their area. It also has a Bulk Upload feature that stores the data of multiple leads by uploading an Excel file and assigns the uploaded leads to a Globe agent.
- Technologies: Git, HTML, CSS, Bootstrap, JavaScript, Angular, AWS, Docker, Bitbucket

Intellicare HIMS

March 2020 - February 2021

- HIMS is an information management system which manages the data of the members of Intellicare, a Health Maintenance Organization.
- The system has a Bulk Upload feature which enrolls multiple members through uploading an Excel file and classifies them per type, either as a Principal or a Dependent.
- Technologies: Git, HTML, CSS, Bootstrap, JavaScript, React, Material UI, Node.js, Electron, Gitlab

EDUCATION

THREE MONTHS INTENSIVE TRAINING COURSE | Zuitt Coding Bootcamp, Metro Manila, PH

Bohol Island State University - Balilihan Campus

- **EXEMPLARY PERFORMANCE AWARD |** 2nd Place in Essay Writing, PASUC 2018
- **PROFICIENT STUDENT AWARD |** Arduino Software Scripting and Hardware Integration

ABOUT ME

There are three words that I could describe myself with: simple, quirky, and carefree. The things that compel me to strive hard are: having a role in helping the society and traveling to places that I have never been to.

My entertainment, when I have free time, is watching eSports and anime. I always find professional eSports interesting and with anime, I look forward to the graphics, character development and the plot of the story. I also go cycling since I have a mountain bike and I like seeing some beautiful scenery, as well as having some kind of workout at the same time.
